Enabling U.S. Government Organizations to do More with Less

At Oran, we understand the complexities of innovation efforts facing government agencies. For 16 years, we have partnered with our government clients on a wide range of business and IT initiatives that have reduced cost, increased operational efficiencies, and enabled our clients to make more informed business decisions. We are committed to helping government agencies accomplish their mission. We use an outcome-based focus to deliver services on time and on budget, which distinguishes us from other companies and allows us to consistently keep the commitments we make to our clients.

Client Delivery Focused, Partnership Approach

We take our mission understanding and technical expertise to deliver the results needed.

Mission Understanding

We support mission critical systems that directly impact our client's mission helping them improve outcomes and maximize results.

Learning & Development

We provide innovative support in the areas of learning management strategy, instructional design, course development, training delivery support services, instructional support services, designing training support services, and education through the use of various online tools.

Client Proximity

We align our operations and support with our client locations, allowing us to be actively engaged in supporting our client's success.

Technology Agnostic

We apply our technological understanding and expertise to address our clients' specific problems. Through our experience and understanding of technology, we provide our clients with the right solution at the right time.

Outcome-based Services and Solutions

Oran's capabilities across diverse disciplines allow us to serve our client's broad range of requirements needed to support their operations. Our diverse teams of subject matter experts work collaboratively with our clients using their mission and program knowledge, experience, and commitment to delivery excellence to help them with specific needs. Key service areas include:

Application Modernization and Maintenance

Deliver analysis, design, prototyping, modernization, and engineering services as well as perform the day-to-day maintenance and enhancement of your business applications, helping reduce costs and ensure faster execution of programs, projects, and other initiatives.

Data Management

Implement data integration, Big Data Implementation, Data Harmonization and Data Governance to improve data maturity and transform agencies to implement data driven decisions. Our Advance Analytics solution focuses on Self-service Business Intelligence (BI), Data Visualization, and Data exploration to empower our clients with actionable data.

Infrastructure Service

Provide strategic Cloud Optimization, Cyber Security (Risk & Compliance, Vulnerability & Threat Management) and DevSecOps support.

Why work with Oran Inc

We have the deep understanding and expertise to help our Federal clients design solutions and deliver results to help make a real and lasting difference to people both in the United States and around the world. Our focus on delivery excellence always puts our clients' needs first. According to our client at the Federal Aviation Administration (FAA), "Oran demonstrated performance levels that are above expectations...works together in a way that is seamless across projects...offers innovative approaches to address acute challenges."

Achieving Mission Success

We have been partnering with the Defense Contract Management Agency for over 10 years on their Application Development and Database Support program, managing over 75 custom built applications and web services supporting 12,000 internal and 6,000 external users.

Driving Bottom-Line Results

We have been supporting the Centers for Medicare and Medicaid Services (CMS) on their Federal Facilitated Marketplace (FFM) program implementing an AWS based DevOps pipeline to deliver enhanced user functionality quicker by reducing the deployment time by 25%, resulting in over \$500,000 in annual savings.

Realizing Return on Investment

For the Defense Contract Management Agency (DCMA) Talent Management System (TMS) contract, we have established a Tier II/III service desk process that has helped enable the Agency in responding to over 50 service desk tickets each week by a single resource resulting in a reduction of tickets by 25% in just three months. More specifically, in just 4 months after award, we were able to clear an existing backlog of 1,000 Hot-line and Warm-line ticket requests while maintaining ongoing operations.

Federal Mission Expertise

- Defense
- Health and Human Services
- Financial Management
- Contract Management

- Training Solutions

About Oran Inc

Oran is an SBA-certified 8(a), Economically Disadvantaged Woman- Owned Small Business (EDWOSB) based in Northern Virginia. We are a management consulting, technology services company, serving clients domestically and abroad. For 15 years, we have delivered technically innovative, reliable, and cost- effective solutions, services, and products to our federal customers. Oran combines unparalleled experience and comprehensive capabilities across Civilian, Health, Defense, and Intelligence Agencies within the federal government.

What makes Oran Inc. different

Oran delivers real world solutions that work in real time to solve real problems. We help make cost reductions more strategic and sustainable for our customers through key enablers that include:

- Leadership alignment, conviction, and accountability
- Transformation blueprints with actionable plans
- Centralized program management
- Communication, culture, and change
- Measuring what Matters

By partnering with us, agencies can reduce non-mission-critical activities, external spend and operational duplication reallocating essential resources to mission critical functions.
